

New Alpha release (v0.0.2) is finished!

2006/10/23

Second (Alpha)-Releases of NanoAjax Frameworks is finished and is ready for downloading. Unfortunately promised release date 22.10.2006 could not complied with.

But within the term the release with finished today (23.10.2006).

Changes of NanoAjax Frameworks are:

- NanoSanitizer gives more security to the Framework (cleans user input from hazardous code { keyword: XSS, SQL injection,... }), with special test script to show NanoSanitizer abilities
- NanoGuardian, which is a base class for user defined classes, it provides an easy to use interface to NanoSanitizer. (usage is strongly recommended, but not necessary for full functionality)
- nice JavaScript libraray (extends String object to imitate well known PHP functions like ltrim, rtrim, trim, repeat, urFirst, nl2br and some more.

{tipsandnotes image="info"}Everybody is invited for testen NanoAjax Framewprk in different environments. Please report all bugs and feature requests initially to the {weblink id="14" title="NanoAjax Framework Bugtracker - Report bugs and feature requests" text="SourceForge Bugtracker"} (later the FlySpray component is installed).
